

wildcore.

**Your business deserves
a website that works
as hard as you do.**

Modern, high-performance websites built for local businesses.

You see it before you pay a dime.

WILD CORE

wildcore.studio

10+
Years building

HEY, I'M COREY

The person behind Wildcore.

I started Wildcore because I kept seeing local businesses — restaurants, salons, escape rooms — stuck with terrible websites or no website at all, while agencies charged \$5,000+ and took months.

So I combined 10+ years of design and engineering experience with modern tools to build something better: premium-quality sites, fast, at a price that makes sense. And you own everything — always.

THE REALITY

Your customers are searching for you online right now.

Before someone walks through your door, they check you out online. They Google your name, read your reviews, and look at your website. What are they finding?

75%

of consumers judge credibility by website design

Stanford Research

53%

of mobile visitors leave if your site takes 3+ seconds

Google / SOASTA

97%

of consumers read reviews online before choosing local

BrightLocal Survey

A bad website — or no website — means competitors are winning your customers.

THE NUMBERS DON'T LIE

What's at stake

76%

of people who search locally visit a business within 24 hours
Google

46%

of all Google searches have local intent
Google

27%

of small businesses still don't have a website
2025 Small Biz Survey

31%

of shoppers skip a business that doesn't have a website
Digital Commerce 360

Every day without a great website is a day your competitors are winning customers that should be yours.

THE LANDSCAPE IS CHANGING

It's not just Google anymore.

The way people find businesses is changing fast. Your website needs to work across all of them — or you're invisible.

SEO

Search Engines

Google still matters. A modern, fast, mobile-friendly site ranks higher and gets more clicks. Businesses on page two get almost zero traffic.

AEO

AI Answers

ChatGPT, Siri, and Google AI Overview answer questions directly. If your info isn't structured right, you're invisible to 800M+ weekly AI users.

LOCAL

Voice & Maps

58% of voice searches are for local businesses. When someone asks "best pizza near me," proper schema gets you recommended.

By 2026, 25% of organic search traffic will shift to AI chatbots. — Gartner

WHAT I BUILD FOR YOU

Not a template — a website built around your business.

- **Modern design**
Mobile-first, responsive — looks great on every screen
- **SEO + AI ready**
Structured data so Google AND AI assistants find you
- **Click-to-call**
One tap on mobile and they're calling you directly
- **Real content**
Your menu, services, hours, photos — not lorem ipsum
- **Lightning fast**
Under 3 seconds load time, optimized for speed
- **Google Maps**
Integrated so customers can find and navigate to you
- **Domain + SSL**
Custom domain, security certificate — all set up
- **Ongoing support**
Updates, tweaks, and care — I don't disappear after launch

Everything is custom-coded for your business. You own the code, the domain, all of it.

HOW IT WORKS

I build it. You see it. Then we talk.

Zero risk. Zero obligation. You only pay if you love it.

1

Tell me about your business

Fill out a quick form or jump on a 15-minute call. I want to understand who you are, who your customers are, and what you need.

2

I build you a prototype

Within 48 hours, you'll have a real, working website to look at. Not a mockup — an actual site you can click through and share.

3

You launch with confidence

Love it? I polish it up, get it live, and hand you the keys. Everything is yours — the code, the domain, all of it.

WHY WILDCORE

I keep it simple.

No hoops. No fine print. No disappearing after you pay. Just great work, delivered fast, from someone who actually cares.
